

PREPARATION OF TEA

Tea is a popular hot drink. The preparation of tea goes through the following stages. At first required quantity of cold water is taken in a kettle. Next the kettle is put on the burning stove and oven. Then the water is allowed to boil until vapor comes out of the kettle. Now required quantity of tea-leaf is put in a tea-pot. After that the boiling water of the kettle is poured into the tea-pot for two minutes. Thereafter the solution is passed through a sieve and poured into cups. Then sugar and milk are added to the liquor in the cups. Now tea is ready to be served. It is sipped hot to enjoy its flavor and taste.
